

The sustainability and feasibility of utilizing *calanus* - Current state of knowledge

- ***What are the major challenges facing Calanus fisheries currently?***
 - How can we move beyond them and allowed for continued growth?
- ***Can Calanus be harvested sustainably?***
 - Key issues in the development of sustainable fisheries
 - Ecosystem knowledge and predictability of ocean ecosystem dynamics
 - Assessment of biomass through modelling
 - Interconnectedness within the marine ecosystem – impact of fisheries – other environmental factors
 - Do we know enough?
- ***Are calanus fisheries feasible?***
 - Harvesting
 - Processing
- ***Governmental role in calanus utilization***
 - What should the role of regulatory authorities be in establishing new fisheries
- Stakeholder engagement and public acceptance
 - What are the challenges in attaining public acceptance
